

HIGH SCHOOL PORTFOLIO: ARRANGEMENT WORKSHEET

Directions: Remember, you are telling the story of your growth as a young man and woman, not simply providing a list of your best work and accomplishments.

For each subject, write a brief description of the class and perhaps what you enjoy or take away from it as particularly inspiring or challenging.

For each accomplishment or example of your best work, try describing why you were proud of this experience and how it helped you grow.

These well-written details will really bring life to your journey through MCA towards your dreams, goals, and ambitions.

Someday, you will be able to look back on this and stand proud of what you accomplished over your four years, and maybe, you will even be able to use this information to inspire you during an internship interview or while writing an essay for a big college scholarship.

Use this outline to craft the text portion of your portfolio. Design and images will come LATER.
